PROJECTS

SPRING 2017

LAUSANNE

PROJECTS

Innovations for Human Health

In 2017, we continue to support the development of new technologies that can improve healthcare and enhance the quality of life. Our focus is on projects that address unmet medical needs and have the potential to make a significant impact.

 Territory of Innovation

A board of experts meets twice a year to select the most promising projects from among those submitted by researchers worldwide. The board's objective is to identify projects that are innovative, technically feasible, and commercially viable, and that have the potential to improve human health.

Co-creation of Breakthroughs

We are committed to fostering collaboration between industry, academia, and healthcare providers in order to accelerate the development and translation of new technologies into clinical practice.

Awards

The Impact Awards recognize and celebrate the achievements of our territory. The goal is to encourage excellence, foster innovation, and inspire others to join us in our quest for breakthroughs in human health.

Lausanne 2017

- Delphine Joffre, CEO of Tech4Cure, on the future of medical research
- Alexandre de Windt, co-founder of Grail, on the potential of liquid biopsy
- Marco Zucchetti, CEO of Mylan, on pricing and access to healthcare
